

SUPPLY CHAIN & PROCUREMENT SERVICES

V 001

10.19

With an extensive experience of offshore and onshore projects, PSW Integrity has developed one of the most comprehensive procurement services.

The requirements of our customers are constantly evolving and the delivery lead times continually shorten.

Our procurement services are delivered in 2 different ways to accommodate processes and lead times. We short-list, evaluate, and periodically audit our suppliers and sub-contractors to maintain the highest levels of quality, service and response times.

Specialist Project Procurement

We offer a flexible professional procurement service - when you need it. More than just transaction handling, we add our technical expertise to recommend the best solutions where PSW believe we can help you achieve your objectives faster and reduce costs.

From there, we purchase the components and equipment from trusted sources and we arrange delivery.

When your need is specific projects, you can trust PSW to go that extra mile.

Managed Procurement Service

Our managed service is ideal for companies who have ongoing procurement requirements for standard components and equipment as well as ad-hoc needs. We can become the trusted partner that takes ownership of the entire process: specifying, sourcing, purchasing, and warehousing. All you have to do is request a delivery. The benefits are invaluable:

- Reliable pricing structure
- Faster delivery lead times
- Transfer of ownership
- Process management consistency

The extra Mile

As well as Maintaining, inspecting, certifying and repairing your onshore and offshore equipment, why not also outsource the responsibility to source, purchase, and store the various components that you need for any short or long-term project?

If you lack storage space, why not speak to us about our warehousing facilities. We can easily keep hold of your stock and deliver them to any location, onshore or offshore, quickly.
